DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to claims 1-3, 19-21 and 30 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claim 1-3, 19-21 and 30 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ellis et al (US 2006/0136965 A1) in view of Grauch et al (US 6,983,478).

Regarding Claims 1, 19 and 30, Ellis discloses a data receiving apparatus connected with a recording apparatus (FIG.3, FIG.4) with corresponding method and a storage medium (FIG.3, -44) storing a program for recording a television broadcast program, and booking to record the program (Para 102 lines 1-3), said data receiving apparatus comprising:

a receiving unit adapted to receive a television broadcast program (FIG.3, -28);
an input unit adapted to input booking information about a program (FIG.3, -40), recording of which is booked by a user instruction in said recording apparatus (Para 102); and
a profile generation unit adapted to generate a user profile of said data receiving apparatus and the recording apparatus on the basis of (a) a view history of a broadcast program received by said receiving unit (Para 107 lines 1-9) and (b) the booking information input by said input unit (Para 107 lines 9-11).

Ellis is silent about updating the user profile if booking for recording is not canceled in said recording apparatus, and not updating the user profile when the booking is canceled in said recording apparatus.

In an analogous art, Grauch discloses a system that keeps track of users to determine if they actually record a program or not and update the user database for billing purpose if the program is recorded (Col 11 lines 48-56).

It would have been obvious to one of ordinary skill in the art at the time of the applicant's invention to modify Ellis' system to include tracking a user to determine if users record a program or not, as taught by Grauch so different user database can be built for different purpose like billing.

Regarding Claims 2 and 20, Ellis further discloses a searching unit adapted to search for a desired program in the television broadcast program received by said receiving unit based on the user profile (Para 77 lines 5-12).

Regarding Claims 3 and 21, the added claimed feature "said profile generating step updates the user profile based on the booking cancellation information in accordance with the recording of the booked program being finished" as has been analyzed and described as in Claims 1, 19 and 30.

Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
